BIOVERGETURES

Stretch mark Prevention and Reduction Cream- Gel

Biovergetures is a non-greasy gel-cream that works to prevent the onset of stretch marks and visibly reduces the appearance of existing stretch marks.

Biovergetures is effective even on stretch marks acquired during adolescence. Biovergetures leaves the skin fresh and smooth. It absorbs rapidly and does not stain.

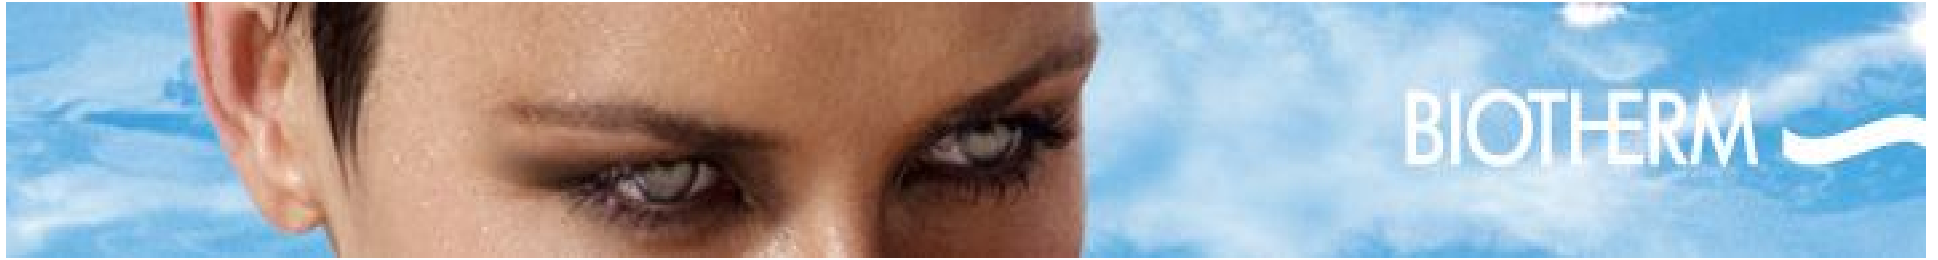

Ingredients

Hydroxyproline, Algo silicon, Shea butter

Application

Biovergetures is applied regularly and should be massaged in until it is entirely absorbed for optimum efficacy.
